

**Police Computer-Aided Dispatch (CAD)/Record Management System (RMS)/
Mobile System**

Proposed Recipient: City of St. Petersburg, FL

Address of Recipient: 175 5th St N, St. Petersburg, FL 33701

Amount of the Request: \$750,000

Explanation: Funding would be used to implement a single police CAD/RMS/Mobile System to be utilized and shared by a number of municipalities in the region. Specifically, the funds would be used to purchase the equipment needed to advance the City of St. Petersburg's role in this multijurisdictional project. The CAD/RMS systems currently in use are rapidly approaching the end of their useful life, making the replacement of the existing independent systems a crucial priority for the community. Additionally, having a shared CAD system will increase efficiency in workflow; reduce repetition of data entry; and save time in managing, processing, and dispatching response resources in emergency situations, thereby saving lives.
